RAVAK AntiCalc® technology

The best service comes directly from the manufacturer

An invisible shield against dirt and deposits on the glass

All water except for rainwater and distilled water contains a certain amount of salts. Their deposits, known as scale, can only be removed with great difficulty. They form a chemical bond with the glass and give it an unsightly tint over time. Common chemical cleaning products are entirely ineffective against scale.
Only the patented RAVAK AntiCalc® technology can reliably protect glass from these permanent stains. All RAVAK shower enclosures and screen glass panes are treated with RAVAK AntiCalc® during production.

Glass treated with RAVAK AntiCalc® - water is repelled and runs down the glass.

Effects of water on glass without the use of RAVAK AntiCalc®.

How to use RAVAK AntiCalc® Conditioner?

First, clean the whole glass pane with a detergent (RAVAK Cleaner). Once the glass pane is absolutely clean and dry, use a dry cloth to apply the RAVAK AntiCalc® Conditioner on the inside of the pane and polish it dry.
The glass will regain its water-repelling properties and will require only standart maintenance with degreasing detergents for the next 3 months (depending oon the hardness of the water).
